

**STATEMENT OF CANDIDATE FOR
STATE ASSEMBLY, DISTRICT 3**

MICHAEL "MICKEY" HARRINGTON

Occupation: Labor Council President

Education and Qualifications:

I want to thank those that voted for me in the June Primary.

I believe in the California Dream, where working families can get a life sustaining job with benefits.

We can still get there with good legislators that support the people that put them in office.

The self interests of legislators and Nay Sayers, stuck on the party line, is a big part of the problem.

We must help small business so we can create new jobs and pay our share of public projects. Federal projects like the high speed train that would create 10,000 jobs almost overnight. We voted to build this project. What is the hold up?

Big Business, Nay Sayers and the like want us back in the early 20th century. Working unsafe jobs, with no regulations: If you get hurt, sick or die on the job it is your fault, not the fault of an unregulated company.

The Right wants to destroy our educational system, by flooding our class rooms with an unreasonable number of students, laying off teachers and the care takers of the schools. We must make education a top priority, including vocational training, so we can compete with other countries.

We must crack down on those that aren't paying their fair share of taxes.

As Californians we can do all these things and more. We can help bring back the California Dream.

It would be my honor to serve you,

Mickey Harrington
